ABOUT ME

Detail-oriented BCA graduate and web developer with a strong foundation in Python, full-stack tools, and responsive interface design. Combines solid technical troubleshooting abilities with a user-first mindset, eager to drive engagement and deliver seamless support within a dynamic customer service and operations environment.

EDUCATION

Bachelor Of Computer Application (BCA)

2023 - 2026

Annamalai University

- CGPA 7.65 | First Class with Distinction

PROJECT

DYNAMIC INVITATION & RSVP PLATFORM

- Live App: <https://invitation-maker-v2.onrender.com/login>
- Tech Stack: HTML5/CSS3, JavaScript, Python, Flask (3.1.3), MySQL, Render, Werkzeug, FPDF, Gunicorn, Git
- Frontend & Email Design: Structured custom, fully responsive HTML5/CSS3 email campaign templates and user interfaces, prioritizing pixel-perfect layouts and cross-client compatibility (e.g., MS Outlook).
- Backend & Logic: Engineered server-side logic using Flask to manage core application processes, secure session routing, and handle dynamic automated email notifications.
- Database & Security: Designed a relational MySQL schema to manage user records, implementing Werkzeug for secure end-to-end password hashing.
- Deployment: Executed version control using Git/GitHub and deployed the web application to the Render cloud platform utilizing a Gunicorn WSGI server.

PORTFOLIO

- <https://sridharansridhar428-spec.github.io/codingal-technical-pitch/>
- A comprehensive look at my technical projects, problem-solving skills, and responsive web interface designs tailored for support and development roles.

SKILLS

- Programming Languages: HTML5, CSS3, JavaScript, Python (Core & Advanced), SQL
- Tools & Version Control: MS Outlook, MS Office Suite, Git, GitHub, VS Code, Cisco Packet Tracer
- Databases & Servers: MySQL, Gunicorn (WSGI HTTP Server)
- Frameworks & Libraries: Responsive Email Design, Flask (v3.1.3), Werkzeug, FPDF
